PA Court of Common Pleas — active litigation

LAWSUIT

Creditworthiness isn't a moment — it's a trajectory.

Creditworthiness isn't a moment — it's a trajectory.

This is the structural gap in B2B trade credit.

PROBLEM

B2B sellers extend trillions in credit with no visibility into buyer health

Current KYB tools verify identity at onboarding — but say nothing about whether a buyer can actually pay.

~60%

of US B2B sales are
made on credit terms
(net-30/60/90)¹

\$4.5T

trade credit
outstanding in the US
— 21% of GDP²

2–8%

of credit sales
become bad debt³

+12%

US insolvencies
expected in 2025
(after 10% surge in
2024)⁴

We start with mid-market B2B sellers

Large enough AR that bad debt is material — but no dedicated credit team.

FINANCIAL SERVICES

ALREADY SERVED

A. B2B Lenders

Baselayer's core market — add credit signals to existing KYB product

LATER

B. Trade Credit Insurers

Concentrated market (Atradius, Euler Hermes, Coface); high switching costs

B2B SELLERS

LATER

C. Enterprise

Large AR books but have in-house credit teams; long sales cycles

PRIMARY TARGET

D. Mid-Market (\$10M–\$500M revenue)

Large AR books, high-ticket orders, no dedicated credit team. CFO/Controller makes credit decisions on gut feel. Highest pain, most underserved.

LATER

E. SMBs

Fragmented, low ticket size, hard to reach at scale

The total addressable market for credit risk is \$15+ billion, with one third of it in the mid-market segment

Insolvencies are on the rise and sellers are looking for new ways to understand risk.

Baselayer's data and existing network puts it in a unique position to redefine how credit decisions are made

ClearTerms seamlessly integrates into sellers workflows to enhance decision-making without disruption.

The Data Moat

- **Real-time access** to unique, high-signal sources (e.g., IRS, UCC liens, litigation/bankruptcy)
- **120M+ US businesses** covered

The Network

- **2,200+ financial institutions** and government agencies enables granular pattern detection
- **Credibility** empowers expansion into new segments

The Performance

- **Fast, accurate and real-time** verification improves decision-making
- **Seamless** credit workflow integration

Every signal in that demo runs on data Baselayer already has.

We suggest a double go-to-market approach that combines direct sales and partnerships with AR/accounting platforms

TARGET CUSTOMER

Size: Mid-market B2B sellers (\$10–500M revenue)

Industry: Wholesale distribution, Manufacturing, Construction materials

Buyer persona: CFO (smaller firms) or Credit Manager (larger firms)

BUSINESS MODEL

Tiered
subscription
(with API calls
limit)

+

Price-per-volume
for additional API
calls

GTM MOTION

1

Direct Sales

- Large accounts (e.g., Baselayer Growth / Enterprise tier)
- Land POC to validate and iterate product

2

Partnerships

- Integrate into AR/accounting platforms (e.g., QuickBooks, Bill.com, HighRadius)
- Enable seamless credit decisioning workflow

We are the team that can help you achieve this vision

Gabriela Aldana

- 4.5 years at BCG (Financial Services, Digital Products)
- Led launch of Chile's first digital bank, 1M users in year one
- B2B contracting and margin optimization in U.S. retail clients

Sergio Sanchez

- Developed venture in credit management during Fall 2025
- 2+ years in B2B payments startups (Growth & Strategy)
- 2+ years in McKinsey (Financial Services, Venture Building)
